Content

Background: COVID-19 pandemic is the defining global health crisis of our time and the greatest challenge we have faced since World War Two , and we should cope all the efforts to overcome this crisis. Objectives: _ To raise community awareness about COVID-19 . _ To train and empower health professions and Students . _ To Offer the sudanese medical and allied health students the opportunity to present their researches' abstracts about fighting COVID-19 in Sudan. Methodology : _Online posters (in English and Arabic) _Radio stations shows _ online sessions _ Webinar for scientific researches and papers . Results : _900 Students from 31 universities in Sudan have Attended 25 sessions . _ 10online posts about COVID-19 were shared in different social media platforms targeting medical and non medical communities _ 8 scientific papers were presented under supervision of experts and professors . Recommendations: Medical Students and allied health Students are the background of their communities , So continues efforts should be carried out to raise their awareness and to empower them in all health issues to overcome COVID-19 pandemic and all other crisis.
