Abstract N°	TUFH202

Content

Introduction : Primary health care (PHC) addresses the majority of a person's health needs throughout their lifetime. This includes physical, mental and social well-being . Gezira medical school is one of the first medical school in the world that implements the concept of the PHC among their medical students by involving in the community outreach program and make a strong contact between the student and community. Objectives: - Involves students In the community outreach program -empowering individuals, families and communities to take charge of their own health. - building future leaders in social accountability. Methods : -community outreach. -participation in awareness campaigns. -participation in the conference that discuss global health issues. Results: 1- Increase confidence and possess the skills to learn the primary health care and deal with society in various ways. 2-Participating in the family education and follow-up program as well as Conference's , as it has many benefits, including: _ The student has the ability to observe and then intervene to change harmful habits in the society. _ Promoting the role of students in Social responsibility. _participating in medical conferences. Conclusion : Gezira medical school has played an important role in refining students' skills and to lead their community, to a society free of diseases by involving him in several programs including a follow-up and education for families, visits to health centers and a nested village field training program. All of this is an example of the student being created to become a successful future leader.
